

Seattle Unveils the World's Greenest Office Building

Source: takepart.com

Published: January 23, 2013

The 50,000-square-foot building will generate all of its energy using [solar panels](#), and all of its water will be provided by harvested rainwater. There will be indoor composting toilets, a system of geothermal wells for heating, and the building's wood-framed structure is made out of Forest Stewardship Council certified wood.
