

Dance Floor That Generates Electricity: Party Power

Source: sustainabledanceclub.com

Published: May 10, 2013

Energy Floors developed the Sustainable Dance Floor™ and launched it in 2008 as the world's first energy generating floor. It is an eye-catching dance floor which can be installed in customized ways for various occasions to represent sustainable innovation. Events range from corporate pavilions on the Olympics, a 3 month club tour through Spain, over festivals to several trade fair and museum exhibitions and auto shows worldwide. All to get a sustainable message across involve and energize visitors and make them aware of kinetic energy as potential renewable energy in combination with fun.
